

International Journal of Smart Grid and Clean Energy

CONTENTS

Volume 5, Number 4, October 2016

Energy System Design and Management

Coordinated management of low voltage power networks with photovoltaic energy sources 213

Brenda Rojas, Mónica Alonso, Hortensia Amarís, and Lorena González

Optimal distribution in smart grids with volatile renewable sources using a message passing algorithm..... 221

Elizabeth Harrison, David Saad, and K. Y. Michael Wong

Advance control of a fully integrated energy system for a building..... 229

J. M. Counsell, Al-Khaykan Ameer, and M. J. Stewart

Optimal configuration of distributed generation based on improved fruit fly optimization algorithm 237

Pan Chao, Lv Jiahui, and Meng Tao

Analysis of the impact of cyber attacks on energy management system in smart grid environment 245

Sangsun Hwang, Pilsung Woo, Sejong Choi, and Balho H. Kima

Comparison of the effect of the distributed generators vs new distribution substation on the reliability of the power distribution grid..... 252

Tawfiq M. Aljohani and Mohammed J. Beshir

Electric Power Generation System

CFD analysis of three and four blades movable vanes type vertical axis wind turbine having movable vanes..... 259

Kadhim H. Suffer, Ghulam A. Quadir, Khairul A. Ismail, and Ryspek U.

System development and performance test of 5 kW wind turbine..... 264

Sugiyatno, Imam Djunaedi, and Haifa Wahyu

Communication and Control in Energy Systems

Empirical model of cellular signal propagation loss for smart grid environment..... 272

Okumbor N. Anthony and Okonkwo O. R

Software defined utility: A step towards a flexible, reliable and low-cost smart grid..... 280

Ramon Martin de Pozuelo, Miguel Ponce de Leon, John Howard, Alan Briones, Jerry Horgan, and Julia Sánchez
